I'm an experienced **Senior QA engineer** and **Team Lead**. I like to treat all projects as products of "real" engineering with all responsibility to certain standards, developing steps to meet the requirements and lead the product to stability. Also, I am a team player, so I like to communicate the project development both with my coworkers as well as client side team members to meet their expectations. Besides my main experience in QA, I am interested in business analysis.

SKILLS

Software Testing ∞

AQA Playwright (TypeScript) ∞

AQA JS(Cypress) ∞

Soft Skills ∞

Managment ∞

API testing ∞

Load testing ∞

Technical documents writing ∞

JIRA administration ∞
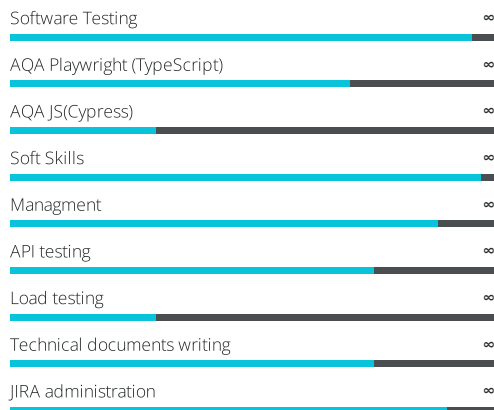

EDUCATION

Master's degree , Uzhgorod National University - **Computer Science**
